 github.com/mercu-tamilselvanP

 Chennai, Tamil Nadu

Seeking a challenging role to apply my problem-solving skills and 8 months of PHP Laravel experience, contributing to impactful projects and continuous professional growth.

## PROFESSIONAL EXPERIENCE

### Full Stack Developer (Intern → Junior Developer)

03/2024 – 01/2025

Guindy Chennai

- Began as a front-end development intern, contributing to responsive UI components using HTML, CSS, jQuery, and JavaScript.
- Promoted to client-facing projects within 3 months due to consistent performance and attention to detail.
- Developed and maintained backend features using **Laravel** and **MySQL**, helping reduce load time by 20% across key modules.
- Collaborated with a team of 7 developers on full-stack solutions, ensuring seamless integration between frontend and backend systems.
- Utilized **GitHub** for version control and workflow management, effectively handling over 130+ pull requests and feature branches.
- Assisted in improving code quality and team productivity by following Agile development practices and participating in sprint reviews.

## SKILLS

### Frontend skills

- HTML, CSS, SASS, jQuery, JS, Tailwind, Bootstrap, ReactJs and Vite

### Backend Skills

- PHP Laravel and MySQL

## PROJECTS

### 1. Funding Incentives (Client Project – GoWebez)

06/2024 – 01/2025

**Role:** Full Stack Web Developer | **Tech Stack:** HTML, CSS, jQuery, Laravel & MySQL

This project consisted of two key modules: Admin and User. The Admin module allowed administrators to enable various funding types for users to purchase.

- Google API Integration:** Developed and implemented the Google API module to enhance functionality.
- Theme and Design:** Redesigned and customized the website's theme and color scheme.
- Website Translation:** Worked on translating the entire website for multilingual accessibility. These are the modules i have worked

### 2. Youtube Clone (Independent Projects)

**Role:** Front End Developer | **Tech Stack :** React, Scss & API

- Developed a YouTube clone that replicates core features such as video playback, video recommendations, and channel browsing using the YouTube API.

- Integrated YouTube API to fetch video data and display video details such as titles, descriptions, and thumbnails.
- Designed and built a responsive UI with SCSS, ensuring compatibility across desktop, tablet, and mobile devices.
- Implemented a video player component with custom controls, enabling users to play, pause, and adjust volume seamlessly.
- Used React to build a modular component-based structure for easy maintenance and future enhancements.
- Optimized the UI for fast load times and smooth user experience with lazy loading of videos and assets.

### 3. IntellyCommerce – Corporate Portfolio Website (Freelance Project)

Tech Stack: React, SCSS, AOS (Animate on Scroll)

- Designed and developed a multi-page, responsive portfolio website for IntellyCommerce, showcasing their digital eCommerce solutions and services.
- Created visually rich and engaging sections like Home, About Us, Solutions, Services, and Projects, focusing on professional design and user experience.
- Implemented AOS (Animate on Scroll) to add dynamic, scroll-triggered animations, enhancing the interactive feel and boosting user engagement across devices.
- Utilized React for modular component-based development, ensuring scalability and ease of maintenance.
- Built custom SCSS styles to create a sleek, modern design with smooth transitions and an aesthetically appealing layout across multiple screen sizes.
- Integrated SEO best practices to improve site visibility and search ranking, enhancing the overall digital presence of the company.
- Project code completed; currently awaiting hosting date for deployment.

---

## CERTIFICATES

---
